

Muhammad Zidan Brilliant

Mataram, West Nusa Tenggara | +6285333714307 | zidanbrilliant@gmail.com | LinkedIn | GitHub

SUMMARY

Fresh Graduate in Informatics Engineering from State University of Malang with a strong focus on Data Analytics, Data Science, and AI Engineering. Experienced in handling large-scale datasets through a professional role at NielsenIQ (NIQ), a global consumer intelligence company, and a certified Data Analyst internship at PLN Icon Plus. Proven ability to build end-to-end data solutions, including data preprocessing, analytics, ETL pipelines, machine learning models, and LLM-based AI agents. Actively involved in leadership and research, a national finalist at LoGraK 2023, and highly proficient in Python, SQL, Power BI, and data-driven problem solving. Passionate about leveraging data and AI to deliver actionable business insights.

EDUCATION LEVEL

State University of Malang – Malang, Indonesia.	Aug 2021 – Jan 2025
Majoring in Informatics Engineering (Bachelor Degree), GPA 3.86 / 4.00.	
Senior High School 1 Kempo – Kempo, West Nusa Tenggara.	Dec 2018 – April 2021
Natural Sciences Major. GPA 93.00/100.00	

EXPERIENCES

NIQ (Nielsen IQ) - Jakarta, Indonesia	April 2025 – Oct 2025
Reference Data Analyst (Project Based).	
NIQ (NielsenIQ) is the world’s leading consumer intelligence company, delivering the most complete understanding of consumer buying behavior and revealing new pathways to growth.	
Key Responsibilities:	
- Oversaw the Consumer Insights E-commerce Project, providing structured analytical feedback and conducting manual item categorization to ensure precise and consistent data labeling across thousands of FMCG products. - Managed the processing of uncoded items, collaborating with cross-functional teams to troubleshoot classification challenges, identify root causes, and improve item taxonomy for retail datasets. - Conducted post-processing validation on categorized data to maintain a high standard of accuracy, consistency, and alignment with NIQ's global classification system. - Supervised the image collection workflow for item creation, ensuring that all digital assets were delivered accurately and on time for reference data use. - Performed secondary data quality control, validating processed items to guarantee that client-facing datasets met internal quality benchmarks. - Actively participated in team reporting, documentation, and process refinement to optimize project performance and meet tight turnaround deadlines. - Contributed to a national-scale retail data intelligence initiative that supports strategic decision-making for brands and retailers in Indonesia. - Strengthened cross-functional communication and sharpened attention to detail through rigorous data validation workflows.	

Certified Internship at PLN Icon Plus (MSIB Batch 6) - Jakarta, Indonesia.	Feb 2024 – Jun 2024
Junior Technician Data Analyst.	
PLN Icon Plus, a subsidiary of PT PLN (Persero), specializes in telecommunications and IT services to support digital connectivity and energy innovation across Indonesia.	
Key Responsibilities:	
- Conducted data preprocessing and cleaning for both retail and corporate PLN customer datasets to ensure accuracy and readiness for analysis. - Performed geocoding of Iconnet customer data and validated coordinate accuracy using ArcGIS Pro for geospatial analysis. - Executed corporate customer classification based on business sectors to support strategic insights. - Developed and ran web scraping scripts to collect supplementary business and market data for predictive analysis. - Contributed to the development of a Machine Learning object detection model for safety equipment verification in PLN field operations. - Participated in data center analysis, identifying factors for optimal temperature management. - Collaborated closely with mentors and cross-functional teams for project planning, troubleshooting, and progress reviews.	

PROJECTS

AI Business Agent – Mataram, Indonesia.	Jan 2026
AI Engineer & Data Scientist.	
• Built a real-time AI-driven analytics system combining time-series forecasting and GenAI to support data-driven business decision-making. • Enabled natural language data querying using LangChain agents, allowing users to interact with sales data via a chat interface.	
SQL AI Agent – Mataram, Indonesia.	Jan 2026
AI Engineer & Data Scientist.	
• Developed an LLM-powered SQL assistant enabling non-technical users to query databases using natural language safely. • Developed a FastAPI backend and web UI to display generated SQL and query results transparently. • Implemented schema validation to ensure safe and accurate database querying.	
Automated Crypto Data Pipeline – Mataram, Indonesia.	Jan 2026
Data Engineer.	
• Engineered a robust ETL pipeline using Apache Airflow and Docker to automate real-time cryptocurrency data extraction. • Developed Python-based DAGs to handle API requests, data transformation with Pandas, and secure CSV storage.	
Machine Learning to Classify Breast Cancer - Malang, Indonesia.	Aug 2022 – Dec 2022
Software Developer and Data Scientist.	
• Developed a machine learning model to classify breast cancer using the Forward Chaining inference method. • Preprocessed medical datasets and trained the model to improve early detection accuracy through supervised learning.	
Machine Learning to Predict Covid in Indonesia - Malang, Indonesia.	Jan 2022 – May 2022
Software Developer and Data Scientist.	
• Built a predictive model to estimate recovery and mortality rates from COVID-19 cases in Indonesia. • Applied machine learning techniques to real-world pandemic data, enabling trend forecasting for public health analysis.	

COURSES & TRAINING

Data Scientist Junior Program - Batch 8 – by Pacmann Academy	April 2024
• Performed web scraping with Python to retrieve and process public datasets for analytical use. • Designed and developed an interactive dashboard using Power BI to visualize key metrics, enabling data-driven insights and informed decision-making.	
Data Science Foundations – by Great Learning.	December 2023
Introduction to Machine Learning, hidden patterns and data, classification algorithms, logistic regression and etc.	
Python for Data Science – by Great Learning.	December 2023
Introduction to Numpy and Pandas Libraries, Series Objects, Dataframe, Matplotlib, various plots, and histograms.	

ORGANIZATIONAL EXPERIENCES

Head of Household Division	Jan 2023 – Dec 2023
In the Organization of the Student Association of the Department of Electrical Engineering and Informatics.	

SKILLS & ACHIEVEMENT

Achievement (2023)	: Finalist of National Ideas and Creative Design Competition (LoGraK)
Languages	: Indonesia, English.
Software	: Microsoft Office, Visual Studio Code, Google Colab, Figma, Canva, Adobe Photoshop.
Technical Skills	: Python, SQL, Power BI, Pandas, NumPy, Machine Learning, ETL, Data Visualization, LangChain, LLMs, Prophet, FastAPI, Apache Airflow, Docker.
Soft Skills	: Good Communication Skills, Doing Things Systematically, Structured and Detailed, Logical and Analytical Thinker, Fast Learner, Team Worker, and Able to Work Under Pressure.
